

1. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones located at various sites;

a computer readable program code means for enabling said computer to receive, from the calling telephones, identification data associated with employee tracking;

a computer readable program code means for enabling said computer to verify said identification data against reference data stored in a reference data base;

a computer readable program code means for enabling said computer to create telephone call records based on some of said telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records.

---

7. (Amended) The computer software product of claim 1, wherein said data that indicates the origin of telephone calls is based on a cellular location.

8. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones located at various sites;

a computer readable program code means for enabling said computer to receive, from the calling telephones, identification data, wherein said identification data indicates an employee;

a computer readable program code means for enabling said computer to verify said identification data against reference data stored in a reference data base;

a computer readable program code means for receiving from the calling telephones computer compatible function codes indicative of whether said employee has arrived or is departing from a work site;

a computer readable program code means for enabling said computer to create telephone call records based on some of said telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records and information indicative of the arrival and departure time of said employee at said work site.

9. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones at various work sites;

2 a computer readable program code means for enabling said computer to receive, from the calling telephones, identification data associated with employee tracking;

3 a computer readable program code means for enabling said computer to compare the indicated origin of each of said telephone calls with information associated with valid work sites that is stored in a reference data base;

a computer readable program code means for enabling said computer to create telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records.

---

16. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones at various work sites;

3  
a computer readable program code means for enabling said computer to compare the indicated origin of each of said telephone calls with information associated with valid work sites that is stored in a reference data base;

a computer readable program code means for receiving from the calling telephones computer compatible function codes indicative of whether an employee has arrived or is departing from a work site;

a computer readable program code means for enabling said computer to create telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records and information indicative of the arrival and departure time of said employee at said work site.

17. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones at various sites;

a computer readable program code means for enabling said computer to receive, from each of said calling telephones, identification data associated with employee tracking;

a computer readable program code means for enabling said computer to compare the indicated origin of each of said telephone calls with information associated with said identification data;

a computer readable program code means for enabling said computer to create telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records.

24. (Amended) A computer software product comprising a computer usable medium having computer readable program code means embodied in said medium for causing an applications program to execute on a computer, said computer readable program code means comprising:

a computer readable program code means for enabling said computer to detect data that indicates the origin of telephone calls received by said computer from calling telephones at various sites;

a computer readable program code means for enabling said computer to receive, from each of said calling telephones, identification data, wherein said identification data indicates indicating an employee;

4  
B a computer readable program code means for enabling said computer to compare the indicated origin of each of said telephone calls with information associated with said identification data;

a computer readable program code means for receiving from the calling telephones computer compatible function codes indicative of whether said employee has arrived or is departing from a work site;

a computer readable program code means for enabling said computer to create telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

a computer readable program code means for enabling said computer to generate a report containing information contained in some of said telephone call records and information indicative of the arrival and departure time of said employee at said work site.

25. (Amended) A method of tracking employees and generating employee reports, the method comprising:

receiving telephone calls by a computer system from calling telephones located at various work sites;

detecting data that indicates the origin of said telephone calls;

receiving from the calling telephones identification data associated with employee tracking;

comparing the indicated origin of each of said telephone calls with information associated with valid work sites that is stored in a reference data base;

creating telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

generating a report containing information contained in some of said telephone call records.

26. (Amended) A method of tracking employees and generating employee reports, the method comprising:

receiving telephone calls by a computer system from calling telephones located at various sites;

detecting data that indicates the origin of said telephone calls;

receiving from each of said calling telephones identification data associated with employee tracking;

comparing the indicated origin of each of said telephone calls with information associated with said identification data;

creating telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and

generating a report containing information contained in some of said telephone call records.

27. (Amended) A system for tracking employees and generating employee reports, comprising:

- a computer system;
- means for coupling the computer system to a telephone network;
- means for receiving telephone calls by said computer system from calling telephones located at various work sites;
- means for detecting data that indicates the origin of said telephone calls;
- means for receiving from the calling telephones identification data associated with employee tracking;
- means for comparing the indicated origin of each of said telephone calls with information associated with valid work sites that is stored in a reference data base;
- means for creating telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and
- means for generating a report containing information contained in some of said telephone call records.

28. (Amended) A system for tracking employees and generating employee reports, comprising:

- a computer system;
- means for coupling the computer system to a telephone network;
- means for receiving telephone calls by said computer system from calling telephones located at various sites;
- means for detecting data that indicates the origin of said telephone calls;
- means for receiving from each of said calling telephones identification data associated with employee tracking;
- means for comparing the indicated origin of each of said telephone calls with information associated with said identification data;
- means for creating telephone call records based on some of said received telephone calls and stamping each of said telephone call records with a time; and
- means for generating a report containing information contained in some of said telephone call records.

29. (Amended) A method of tracking employees and generating employee reports, the method comprising:

- placing telephone calls to a computer system from calling telephones located at various work sites, wherein said computer system detects data that indicates the origin of said telephone telephones, creates telephone call records based on some of said telephone calls and stamps each of said telephone call records with a time;
- entering at the calling telephones employee identification data associated with employee tracking that is verified by said computer system against reference data stored in a reference data base; and
- receiving a report containing information contained in some of said telephone records.
